Movie Booker

Weekly Progress Report – 14 January 2013

John Smith, Project Lead

Project Description:

Movie Booker is an application to allow the public to book movie sessions online before travelling to the cinema. They can pay for tickets, select their reserved seat, and print out the tickets on their printer. This application will allow our client to more easily convert online leads into sales, and will reduce waiting times at ticket counters.

Total Issues:	94	**Remaining Issues:**	23
Total Time Spent:	26.7 weeks	**Estimated Time Remaining:**	12.4 weeks
